- [2DVD](#)

Flight Date:

Tuesday, May 17, 2011

Status:

Green

All 5 NASA 2DVDs are collecting data.

Maintenance:

SN_25: both cameras had low video signals (<80), these were corrected.

SN_35: camera a video signal fell below 80, this was corrected - this needs to be monitored closely.

SN_37: camera a video signal fell below 80, this was corrected.

Yesterday's Maintenance:

SN_37: both bulbs were replaced, video signals were adjusted, 2, 4, and 6 mm spheres were dropped to ensure calibration was still good.

SN_35: camera a video signal fell below 80, this was corrected.
